Subject: mag. Črtomir Remec re-elected for the President of the Slovenian Chamber of Engineers

Dear Sir, dear Madam,

Allow me to inform you that last week Mr. Črtomir Remec was re-elected to the post of the President of the Slovenian Chamber of Engineers for the period 2016 - 2020.

He won elections with big majority that can be understood as a confirmation of his and Chamber's achievements on the field of Construction, Spatial, Professional and Public Procurement legislation and active role of the Chamber towards daily politics and public administration.

In the future programme, he finds the challenge in the ongoing acceptance procedure of new legislation, rise of the Construction sector, domestic and regional activities as well as inclusion and invitation of young engineers to the Chamber and its activities.

Yours sincerely,

mag. Barbara Škraba Flis, univ. dipl. inž. grad.
Secretary General of the Slovenian Chamber of Engineers
